1016-32-102 **Thomas Bloom*** (`bloom@math.toronto.edu`), Department of Math,University of Toronto, 40 St. George St., Toronto, ON M5S2E4, Canada. *Random polynomials and (pluri)-potential theory.* Preliminary report.

we will review the concept of random polynomial in one variable and some classical results on their zero distributions. then we will discuss more recent results on zero distributions of random polynomials in one and several variables related to (pluri)potential theory. (Received February 06, 2006)
